If you were looking for a true remastered game, this isn't it. The ending is different, there is an extra character, and a lot of the gameplay more closely resembles the newer games of the series as opposed to the classic ones. It's okay, I still prefer the original SCK but it's nice to not have to change disks. I would recommend a play, but only if you've played the original one first.. can't recommend this game because its dictionary is pretty \u2665\u2665\u2665\u2665\u2665 and that in all the languages I've tried...

otherwise it's ok. I used to have this game on a disk years ago but I lost it and I spent years trying to remember what the game is. Now I have found it. This game is very hard and the story is very confusing. I've still not got passed the first level. The controls are very annoying since it only uses your mouse, but if you want a very weird game from the 90's and you have the time and patience to play it. I reccomend it.. Trash, just complete trash and I can't get a refund. Steer well clear of this diabolical attempt at making a 'HOT' VR game, it's complete rubbish. I get turned on more by Lego!. Best price for two fairly mediocre expansions. If you want them, get them here.. love this game I have the origanal and gold I played a world war one senerio I seen austria and germany take over france and russia and I took over the uk france, germany, brazil, and meicxo this game is endless so many possiablitys 10V10 a must play. This game...wow. It is AMAZING. On my previous account I had 162hrs on this bad boy! After being emmersed into this game, I could tell this is the best (and it is credited for that) WW2 game out there. Its sister game, Rising Storm 2 (after the Rising Storm DLC) is a great game, but doesn't step close to the amazement and ore I got out this game. It has loads of mods, from custom maps, skins, and even FACTIONS (Heroes of the West). The arsenal is huge, and the default Russian\German stronghold maps are glorious! The Rising Storm maps (USA\Imperial Army) are still amazing, but, more graphically intense, and nowhere near as fun to play on.

So, my averaged specs would be: 4gb RAM, i3 2nd Gen, GTX420 (maybe) and Win7 x64. However, I found this game ran smoothly (60fps av.) on 4gb I5 2nd Gen, GT1030, Win10 x64 (my specs). But, be warned, this game is notorious for its\u2665\u2665\u2665\u2665\u2665patches. I came across an issue where the game refused to load. But, I fixed the DirectX problem it was having by installing Rising Storm 2, then reinstalling RO2\RS.

My quick disclaimers: This game is hardcore stuff. You need a few hundred hours and lots of fps experience to cope with the damage mechanics and environment. I suggest training yourself if you want to master this game, because, to this date, I am still average compared to Veterans who have been playing this\u2665\u2665\u2665\u2665\u2665for years.

Anyway, buy it when IT IS ON SALE (waste of money and ripoff when it is on standard retail prices), and good luck.

English\_Sniper. plays pretty cool with a controller but has pretty long loading times.

also freaks me out somtimes because one of the noises the alien makes sounds like it is saying my name

I want to recommend this game, but not having the option to play just with friends only as an option in the base game is a big downside for me personally with all the try hard players about.

The game is fun don't get me wrong, but if your looking to just play and mess around with just your friends you will have to download third party LAN software, which can be tedious for someone not in know and all your friends will have to do the same.

Hope this has been helpful information.. Ok, to start, I can say the train is decent, to say the least, but it currently serves little purpose, which i'll state why later.

The Class 68's runs pretty well, although I do think the sounds are a little too quiet on the engine. As for the MK2e coaches, the coach numbers are COMPLETELY wrong (I've edited my number files to change them), and if i'm not mistaken Abellio Scotrail only use the TSO's and BSO's (based off of their current formations)

Now, the reason why this serves little purpose is the route DTG decided to include this for pretty much only lets the 68 properly run between Haymarket and Edinburgh, since they're used on the Peak Hour Fife Circle services. Other than that, routewise, WCML North is the only other route where they run on (when they run ECS from Motherwell/Mossend to Edinburgh via Carstairs)

Overall, I give this a 10/17. Wonderful! Short (10 minute) magical non-interactive experience with stunning visuals and music. Wonderful demo for those new to VR, and a something to experience even for grizzled VR veterans. Note it does move around, so it may not be for those especially prone to VR motion sickness.. so far have to say that this game isn't bad. it's got a few issues that i would love to see fixed, for one controller support would not be all that hard in this game, twin stick controls and triggers (but that's just me being greedy :p)

maybe change the cursor to a targetting symbol so i can see where i'm aiming a bit better? also could we get a system that allows us to give survivors a weapon to aid them so i'm not feeling like i'm playing babysitter? I love zombie games, but i hate it when i feel like i'm stuck as the babysitter ><

Otherwise? game's pretty good so far. Would definitely recommend to a friend who likes games like project zomboid and other top down survival/zombie games.. Ah yes. Rayforce! Sweet sweet Rayforce! Please release the game here on steam. Bought the DLC just because it was for Rayforce. It's now my favorite ship besides the Genesis Silver Hawk. Oh, and Taito? Please also release G Darius on Steam?. First Horror game ever to take place in a creepy dark Hospital :)

ARAYA is a very well made one of the kind tho, some well placed scares, creepy atmosphere and a few chase scenes. Its visually nice, it controls very good, the Flashlight is good. All in all a very nice Horror game for all horror fans out there.

<https://youtu.be/ZZAAjqSI0UY>. It's not often I leave bad reviews, but I'm afraid that this app (in it's current state) really isn't nice to use. It's not true VR, its only photos with 360 view, and the rendering for the photos is too slow, so when the camera is moving over the picture it gives me motion sickness type symptoms. The movement with the controllers is also pretty hit and miss, I can only move every now and again, no matter how often I try.

There are positives in this app in as much as the interviews are quite interesting and the narration can be interesting too. Apart from this, I would either wait until it's either on sale or until the bugs are ironed out.

I will happily update this review if it changes, but for now I would give it 4/10
